ALIENS SHOW HOW HACKERS STEAL PASSWORDS

SWIPE LEFT

INFOSECTRAIN

Educate. Excel. Empower.

FOUR ARMS

breaks in by force, just like a brute force attack that tries every possible password until one works.

TIPS

Use long, complex passwords with a mix of characters and set up account lockout after failed attempts.

SWIPE LEFT

GREY MATTER

uses brains over brawn, just like a dictionary attack that guesses your password using common words.

TIPS

Don't use real words or names.
Go for unpredictable, random
combos instead!

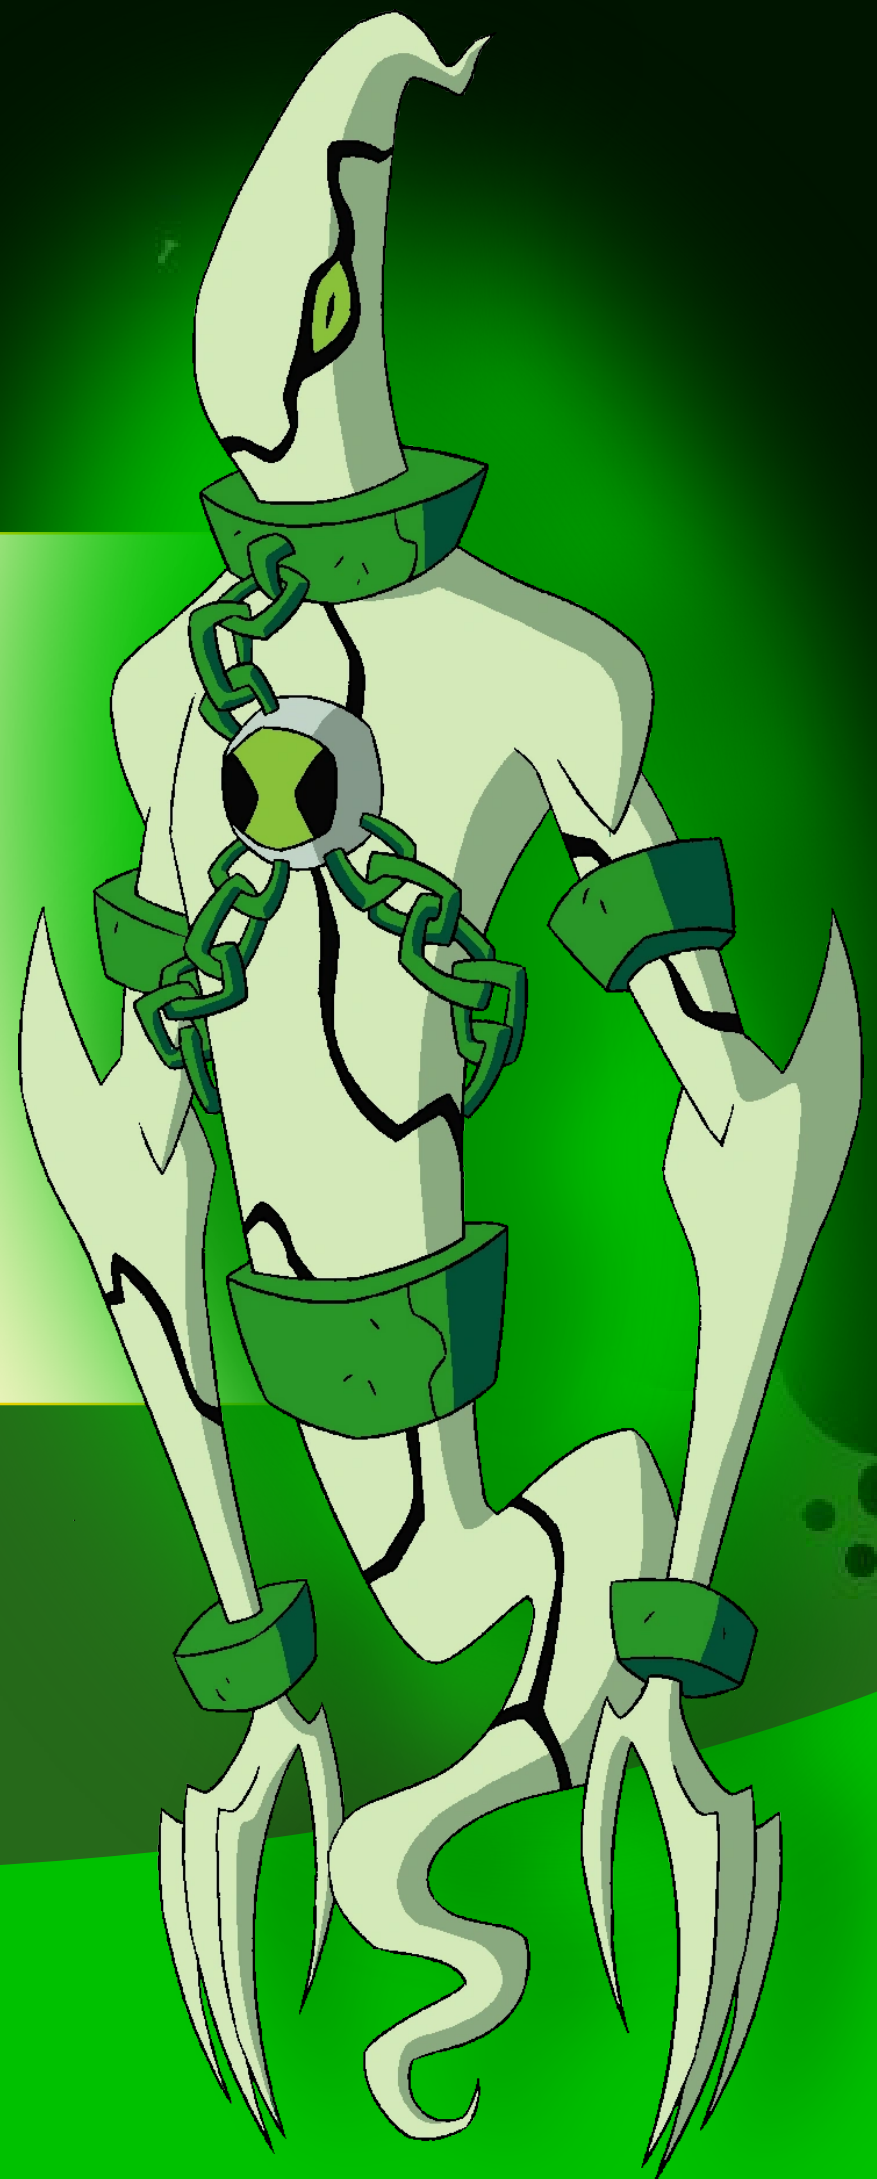

GHOSTFREAK

sneaks up unseen, like phishing emails that trick you into revealing your passwords.

TIPS

Never click suspicious links,
always verify sender emails,
and turn on 2FA.

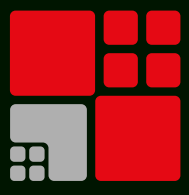

UPGRADE

merges with machines, just like keyloggers that secretly track what you type.

TIPS

Use trusted devices, install antivirus software, and keep everything updated.

INFOSECTRAIN

Educate. Excel. Empower.

HEATBLAST

fires rapidly, like password spraying, where hackers try common passwords on many accounts at once.

TIPS

Use strong passwords and avoid setting obvious ones like "123456" or "password."

SWIPE LEFT

STINKFLY

sneaks in and spreads, like malware that gets planted to steal or expose your passwords.

TIPS

Avoid downloading unknown attachments or software. Keep systems updated.

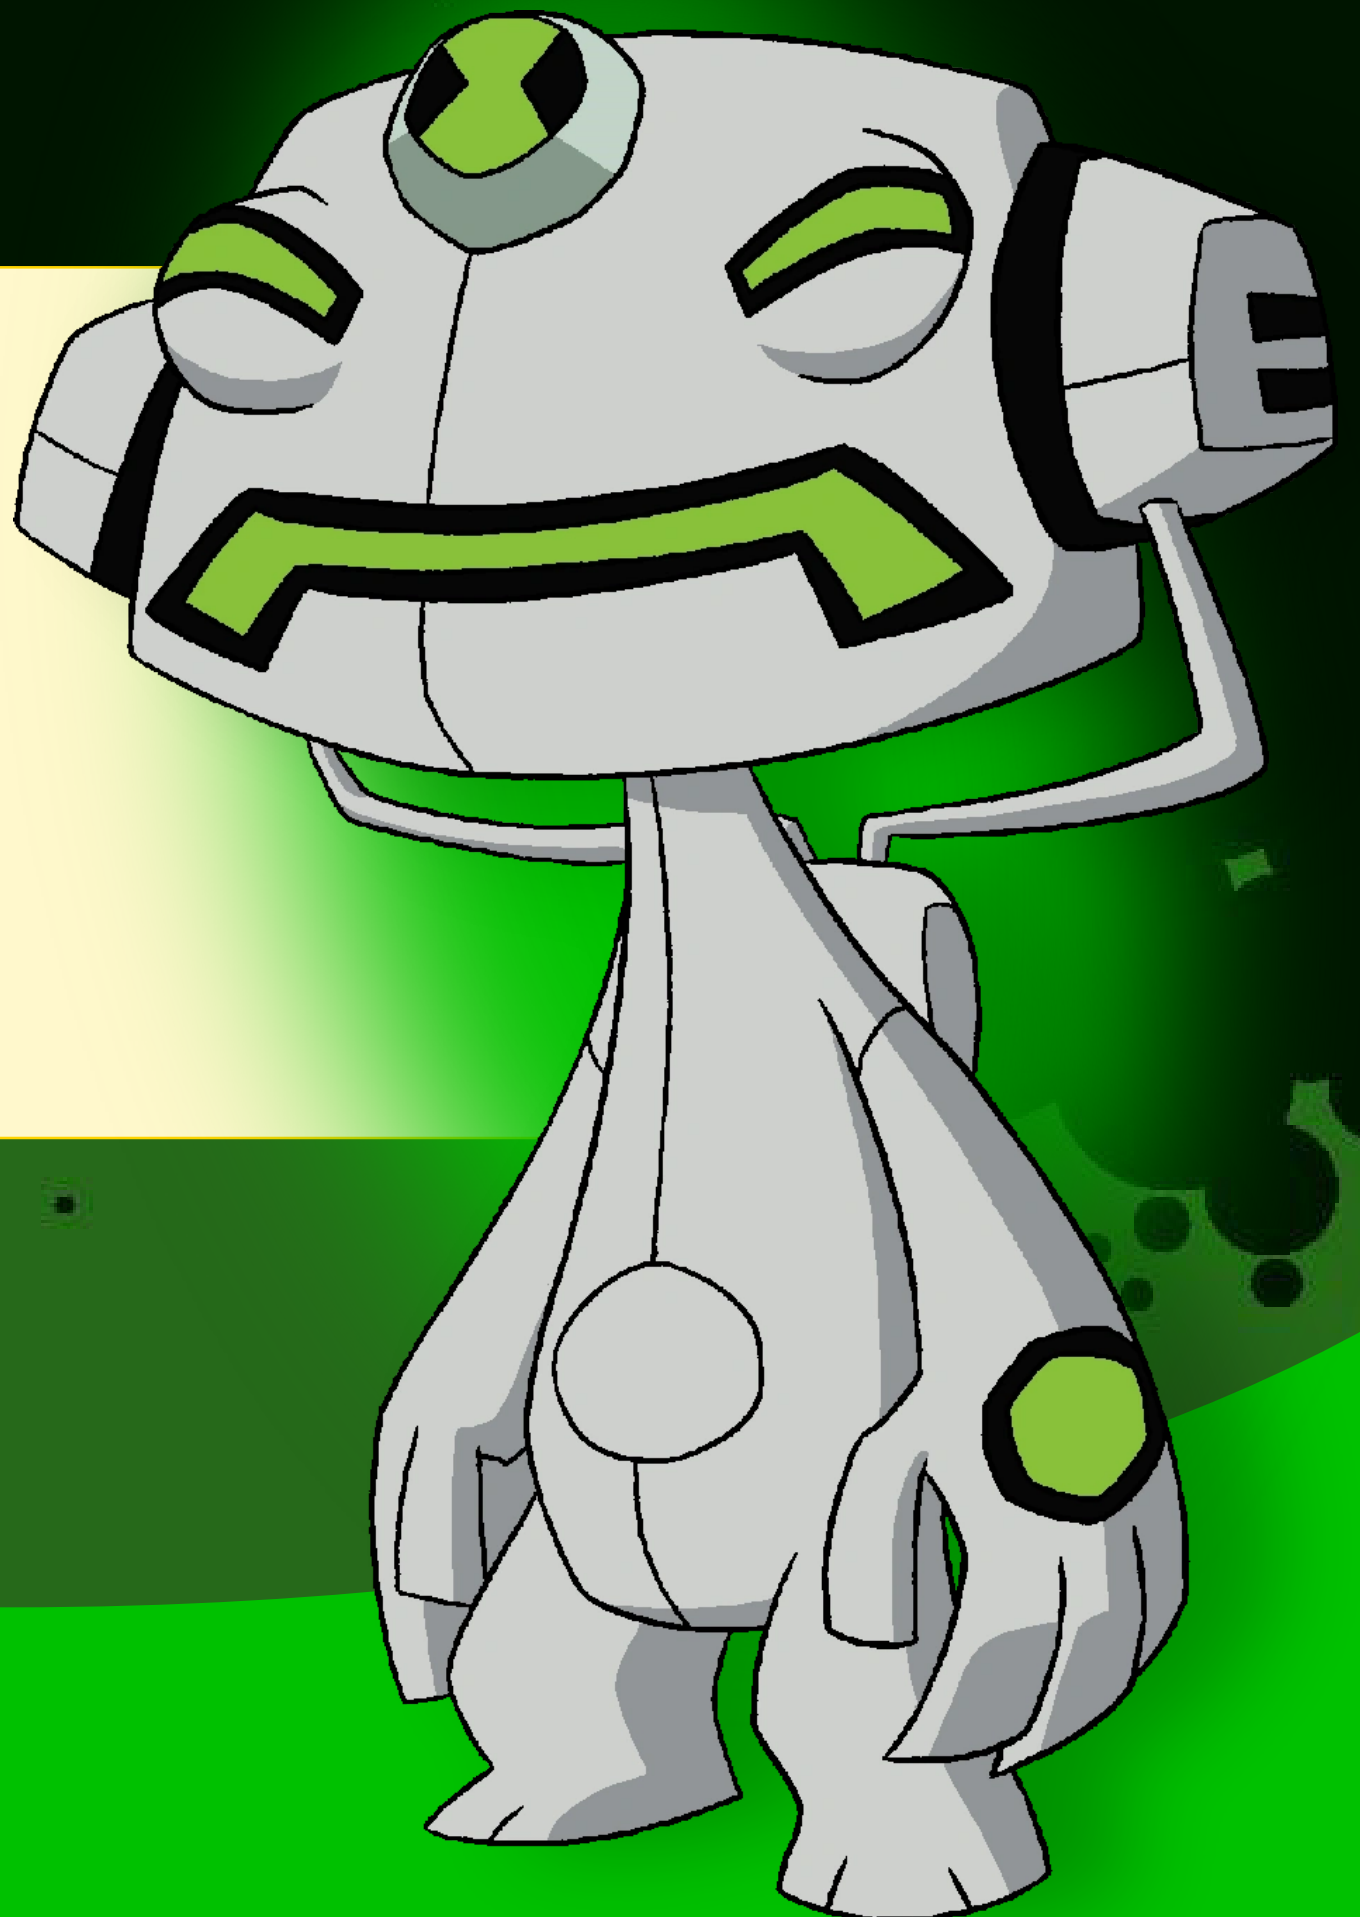

ECHO ECHO

tricks with sound, just like vishing calls pretending to be banks or officials to steal passwords.

TIPS

Never share OTPs or login info over calls. Verify the caller independently before trusting them.

Ben uses the right alien for the right enemy.

Use the right strategy to defeat password
attackers and keep your accounts safe.
